

**MARINEGRAPHICSINK**

**BOAT WRAP COLLECTION**

## WORLD WIDE

Marine Graphics Ink have established a range of trusted print partners around the globe. They use only quality materials, and the teams have a meticulous approach to their printing and installation.

We know it is a combination of imagery, state of the art printing and expert application that creates the most outstanding results. That is what Tinny Wraps delivers.

## BENEFITS OF WRAPPING

Boat wraps transform a vessel in a fraction of the time and price it takes to prepare and paint a hull. Maintenance is also minimised with only a wash down required when cleaning. Marine grade vinyl protects the boat's gelcoat and paint from discoloration and tarnishing. When the wrap is removed, the surface is exactly as it was before.

*wrap: Offshore Psychadelics (page 15)*

## ABOUT MGI

Marine Graphics Ink was founded by Nick Hannan in 2008 to bring quality and contemporary images to the marine industry and boat wrap market.

Nick's passion for the water, attention to detail and his traditional fine arts training have combined for him to be regarded as one of the finest marine artists working today. His work has remained at the forefront of design and style. Since then, Marine Graphics Ink now wraps boats all around the world.

## THE DESIGNS

These boat wrap designs provide endless possibilities for your boat. The collection encompasses everything from offshore sport vessels to river punts. The designs are individually customised so the artwork fits perfectly along the shape of your hull. All of the designs are interchangeable and can be customised to create a one-off piece.

## DESIGN - PRINT - INSTALL

Once we have your boat's measurements, a scale template is drawn up and the design is sized to fit your boat. The wrap design is then sent to you for amendments. Finalised files are then sent for printing.

UV laminate is applied to the print for durability and to prevent colour fade. The boat is then booked into one of our approved installers. If we do not have an install team in your area, we will work with you to locate a company that can apply the wrap.

To fit the wrap we require you to measure the length of the gunnel and height every 1 meter. Send the measurements and a picture of your boat to [lowtide@tinnywraps.com.au](mailto:lowtide@tinnywraps.com.au)

Marine Graphics Ink designs are sold exclusively through selected print partners around the globe. To access our collection, find an installer near you and to learn more about the benefits of wrapping your boat, visit
